## EXPLANATORY NOTES

1. **Source of Data.** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to the Dominion Bureau of Statistics.

2. **Time Periods** Import statistics for any month include all goods declared on import entries received at DBS during the calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the month in which these imports actually occurred.

3. **Coverage.** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may be, however, a difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.

a. **Exclusions.** The following commodity movements are excluded from import statistics (most are recorded separately as Special Transactions-Non-trade in Table 4): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin, settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadians returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada; and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker

## NOTES EXPLICATIVES

1. **Source des données:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes, sauf dans le cas des importations de l'électricité, qui sont déclarées directement par les compagnies importatrices au Bureau fédéral de la statistique.

2. **Périodes de temps.** La statistique des importations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'importation parvenus au B.F.S. durant le mois civil. Il y a un décalage d'une semaine entre le dédouanement effectif des importations et l'arrivée des documents qui s'y rapportent au B.F.S. Les importations d'électricité sont ordinairement comprises dans la statistique du mois où elles ont effectivement eu lieu.

3. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Il peut y avoir, toutefois, une différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois.

a. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des importations (la majorité est classée séparément en Transactions spéciales hors commerce au Tableau 4): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 882-99) et une petite quantité de déchets d'or sous forme de balayures de bijoutiers (classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada ou rapportées par les canadiens rentrant de leur service hors du Canada; les importations provisoires pour expositions et concours, les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement; les navires de construction et d'immatriculation britanniques importés pour usage au Canada, et les navires

supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country from which goods are consigned to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are blank.

Units of weight or volume are measured net of the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Numbers refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit cannot be calculated). All units of quantity used in this report are defined on page 9.

6. **Values.** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of imports from a particular country in any commodity class is less than \$500, a line for that country is printed if a quantity is available and only the quantity is shown. Where the cumulative value is \$500 or more but the value for the current month is less than \$500 a quantity (if applicable) but no value appears in the current month column. All totals and cumulative values are calculated from unrounded figures and rounded independently, they will therefore often differ from the sum of the rounded figures shown in the report.

achetés pour usage comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada: les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens; en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien.

4. **Pays de provenance** Les importations sont créditées au pays de consignment vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.
5. **Quantités:** Les Tableaux 3 et 4 donnent les quantités suivant les unités déterminées pour chaque classe dans la "Classification des marchandises d'importation", vol. 1 (B.F.S. numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas mentionnée, les colonnes de quantité demeurent en blanc.

Les unités de poids ou de volume sont mesurées nettes de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le tarif douanier. Le nombre vise les articles complets (ou suffisamment complets) importés, sauf les pièces de rechange. Les nombres représentent des unités complètes (ou assez complètes) exportées, sans les parties (pour les catégories où la valeur indiquée comprend à la fois des unités et des parties d'unités, il est impossible de calculer la valeur moyenne par unité complète). Toutes les unités de quantité employées dans le présent rapport sont expliquées à la page 9.

6. **Valeurs:** Ordinairement, la valeur des marchandises importées est la valeur déterminée pour fins de droits de douane. La loi canadienne sur les douanes exige généralement l'évaluation des marchandises f. à b. au point d'expédition dans le pays exportateur mais, les importateurs déclarent souvent la valeur c.a.f. pour les marchandises en franchise ou les marchandises sujettes à un tarif déterminé. On s'efforce d'assurer que la valeur f. à b. soit régulièrement employée dans la statistique des importations.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des importations en provenance d'un pays en particulier dans une catégorie de marchandises est inférieure à \$500, une ligne apparaît dans le rapport si une quantité est disponible et la quantité seulement est indiquée. Lorsque la valeur cumulative est de \$500 ou supérieure mais, pour le mois en cours, inférieure à \$500, une quantité (si disponible, paraît mais par contre aucune valeur ne paraît dans la colonne du mois en cours. Tous les totaux et toutes les valeurs cumulatives sont calculés à partir de chiffres non arrondis et sont arrondis indépendamment en milliers de dollars; ils différeront donc souvent de la somme des chiffres arrondis du rapport.

7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears on page 10, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of this report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.
10. **Treatment of Confidential Information:** It is occasionally necessary when producing current statistics to withhold publication of details of imports where commodity or country information is known to involve disclosure. The suppression of country detail, however, does not affect class totals, which include all transactions which have been reported to DBS during the calendar month.
7. **Abréviations:** Plusieurs descriptions de pays et de marchandises employées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations des pays paraît à la page 11 et des descriptions complètes de toutes les marchandises paraissent dans la "Classification des marchandises d'importation", Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".
8. **Rectifications:** Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de ce rapport.
9. **Classification des pays:** Quoique les statistiques soient ventilées géographiquement les désignations des états et des territoires ne comportent nullement une signification politique, territoriale ou constitutionnelle.
10. **Renseignements confidentiels:** Dans la production des statistiques courantes, il est parfois nécessaire de supprimer les détails des importations de certains produits pour protéger le caractère confidentiel de données individuelles, qui pourrait être compromis par la publication de chiffres pour certains produits ou certains pays. La suppression des détails pour les pays ne modifie toutefois pas les totaux de classe, qui comprennent toutes les opérations dont il a été fait rapport au B.F.S. au cours du mois civil.

## NOTES ON SAMPLING

Commencing January 1, 1969, documents of imports from the United States valued at less than \$1,500 each have been subject to a 10 per cent systematic sample to provide estimates for low-value imports from that country. Import documents from the U.S. exceeding \$1,500 and all import documents from other countries, regardless of value, continue to be processed and compiled by complete count.

All documents are sorted into homogenous commodity groupings according to tariff item information on the document. The low-value documents covering imports from the U.S. are selected from each commodity grouping and are subject to a systematic sample with a random start

Once the document is selected through the sample procedure, the value, quantity and customs duty of each sample line are mechanically inflated by dividing by the sampling ratio. For example, if the sampling ratio were 1/10, all lines shown on the sampled documents would be multiplied by 10, and the estimates thus derived are included with the complete count statistics.

It should be noted that the aggregate value of low-value documents of U.S. imports accounts for 6 per cent to 7 per cent of the import total, (8 per cent to 10 per cent for imports from the U.S.) but accounts for some 60 per cent of all documents (some 70 per cent of documents for imports from the U.S.).

The estimated \$80 million a month of low-value U.S. imports is subject to a sampling variability of 1 per cent to 2 per cent. This means that there is a 2 in 3 chance of the estimated value differing from the "true" value by not more than 1 per cent to 2 per cent.

Estimates for individual commodity classes are of course subject to varying degrees of sampling variability. The closeness of individual estimation to "true" values also varies with the universe of documents selected for the particular class in any particular sample. While it is difficult to represent this in tabular form, readers should be aware that the odds against a particular estimate being close to the true value by a specified percentage increase quite rapidly as the universe of documents upon which the estimate is based decreases.

## NOTES SUR LA MÉTHODE D'ÉCHANTILLON

Depuis le 1er janvier 1969, on établit à partir d'un échantillon systématique de 10 p. 100 des documents concernant les importations d'une valeur inférieure à \$1,500 des estimations sur les marchandises de faible valeur importées des États-Unis. Les données sur les marchandises valant plus de \$1,500 importées des États-Unis et sur toutes les marchandises importées des autres pays, quelle qu'en soit la valeur, continueront d'être dépouillées et compilées exhaustivement.

Tous les documents sont répartis en groupes homogènes de marchandises, suivant les groupes du tarif douanier. Sur chaque groupe, on prélève les documents sur les marchandises de faible valeur importées des États-Unis et on procède à un sondage systématique dont le premier élément est choisi au hasard.

Pour chaque document sélectionné par sondage, on gonfle automatiquement la valeur, la quantité et les droits de douane figurant sur chaque ligne, en les divisant par le taux d'échantillonnage. Par exemple, si le taux d'échantillonnage est de 1/10, les données sur chaque ligne des documents sélectionnés sont multipliées par 10 et les estimations ainsi calculées sont incorporées aux résultats de la compilation exhaustive.

Il convient de noter que les documents sur les importations de faible valeur en provenance des États-Unis représentent de 6 p. 100 à 7 p. 100 de la valeur globale des importations (de 8 p. 100 à 10 p. 100 des marchandises importées des États-Unis), mais quelque 60 p. 100 de l'ensemble des documents (environ 70 p. 100 des documents sur les importations des États-Unis).

Vu qu'elle résulte d'un sondage, la valeur estimative des marchandises de faible valeur importées chaque mois des États-Unis (80 millions de dollars) peut varier de 1 à 2 p. 100 par rapport à la valeur "réelle". Cela veut dire que, dans 2 cas sur 3, la valeur estimative ne diffère pas de la valeur réelle de plus de 1 ou 2 p. 100.

La variabilité de sondage des estimations peut varier d'une catégorie de marchandises à une autre. L'écart entre chaque estimation et la valeur "réelle" varie également, dans tout sondage, en fonction de l'univers de documents sélectionné pour chaque catégorie. Il est difficile de représenter ceci sous forme de tableau, mais le lecteur ne doit pas oublier que le nombre de chances d'obtenir une estimation ne différant pas de la valeur réelle de plus de tel pourcentage diminue rapidement si l'univers de documents qui sert de base à l'estimation se restreint.

## UNITS OF QUANTITY

BBL .....	Volume in barrels.
CARAT .....	Weight in carats.
CORD .....	Volume in cords.
CWT .....	Weight in units of 100 lb.
CWT N .....	Weight of contents in units of 100 lb. (containers excluded).
DOZ .....	Number of dozens.
DZ PR .....	Number of pairs in dozens.
FT .....	Length in linear feet.
GAL .....	Volume in Canadian gallons.
GROSS .....	Number of gross.
KG .....	Weight in kilograms.
LB .....	Weight in pounds.
LB N .....	Weight of contents in pounds (containers excluded).
M .....	Number in thousands.
M B F .....	Volume in thousand board feet.
M C F .....	Volume in thousand cubic feet.
M KWH .....	Thousand kilowatt hours.
NO .....	Number.
OZ .....	Weight in ounces.
PACK .....	Number of packs.
PAIR .....	Number of pairs.
P GAL .....	Volume of alcoholic content in Canadian gallons of the strength of proof.
PKG .....	Number of packages.
SF 3/8 .....	Volume in square feet of 3/8 inch in thickness.
SQ FT .....	Area in square feet.
SQ YD .....	Area in square yards.
TON .....	Weight in short tons of 2,000 lb.
TR OZ .....	Weight in troy ounces.

## UNITÉS DE QUANTITÉ

BRL .....	Volume en barils.
CARAT .....	Poids en carats.
CORDE .....	Volume en cordes.
DOUZ .....	Nombre de douzaines.
D PRE .....	Nombre de douzaines de paires.
GALL .....	Volume en gallons canadiens.
GAL P .....	Volume du contenu alcoolisé en gallons canadiens de preuve.
GR .....	Nombre en grosses.
KILO .....	Poids en kilogrammes.
LIV .....	Poids en livres.
LIV N .....	Poids du contenu en livres (récipients exclus).
M .....	Nombre en milliers.
M KWH .....	Milliers de kilowatts-heure.
M PCU .....	Volume en milliers de pieds cubes.
M P P .....	Volume en milliers de pieds planche.
NOMB .....	Nombre.
ONCE .....	Poids en onces.
ON TR .....	Poids en onces troy.
PAIRE .....	Nombre de paires.
PAQ .....	Nombre de paquets.
PC 3/8 .....	Volume en pieds carrés de 3/8 de pouce d'épaisseur.
PI .....	Longueur en pieds linéaires.
PI CA .....	Superficie en pieds carrés.
QTL .....	Nombre en quintal en poids de 100 livres.
QTL N .....	Poids du contenu en quintal de 100 livres (récipients exclus).
TONNE .....	Poids en tonnes courtes de 2,000 livres.
VG CA .....	Superficie en verges carrées.

# KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the annual Volume III, Imports 1966-1968, Catalogue No. 65-203. Amendments effective in any year are listed in the January report for that year. The use of state or territorial titles carries no political, territorial or constitutional implications.

Afghanistan .....	542	Afghanistan	Korea North .....	563	Korea, North
Albania .....	242	Albania	Korea, South .....	564	Korea, South

\* Imports of electricity were normally included in statistics for the month in which they actually occurred. As of June 1971, however, such imports are reported with statistics for the following month.

Les importations d'électricité étaient ordinairement comprises dans la statistique du mois pendant lequel elles avaient effectivement eu lieu. Cependant, depuis la statistique de juin 1971, ces importations sont comprises avec les statistiques du mois suivant.

#### NOTE TO READERS

This issue of "Imports by Commodities" has been chosen to test a new printing technique and at the same time to assess users' reactions to the report in its present form. While the new presentation is still regarded as experimental, it may be adopted permanently if among other considerations it is found acceptable by the readership of this report at large.

The printing technique adopted in the pages that follow allows for the possibility of distinguishing, by the use of different print fonts, the various components of each table. It also allows the French version of the commodity descriptions and of the countries to be shown on the right hand side of the tables in order to facilitate reading.

Planning of other External Trade publications would be greatly helped if your thoughts on the new lay-out be expressed as comments addressed to:

Trade Information Section,  
External Trade Division,

Tunney's Pasture,  
Ottawa, Ontario K1A 0V5.

#### NOTE AUX LECTEURS

Nous avons choisi le présent numéro de "Importations par marchandises" pour faire l'essai d'une nouvelle technique d'impression et pour prendre en même temps l'avis des utilisateurs devant la forme actuelle du bulletin. Même si cette nouvelle présentation demeure une expérience, il est possible qu'elle soit adoptée à titre définitif surtout si les lecteurs de ce bulletin la trouvent satisfaisante.

La technique d'impression employée dans les pages qui suivent donne, par l'emploi de différents caractères d'imprimerie, la possibilité de distinguer les divers éléments de chaque tableau. Elle permet en plus de présenter la version française des descriptions de marchandises et des pays à la droite du tableau, ce qui facilite la lecture.

La planification d'autres publications du Commerce extérieur serait grandement facilitée si vous nous donniez votre avis sur la nouvelle présentation en envoyant vos observations à l'adresse suivante:

Section de l'information commerciale,  
Division du commerce extérieur,

1. **Source of Data:** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.
2. **Time Periods:** Import statistics for any month include all goods declared on import entries received at SC during the calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in SC. Electricity imports are usually included in statistics for the month in which these imports actually occurred.
3. **Coverage:** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may be, however, a difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.
  - a. **Exclusions:** The following commodity movements are excluded from import statistics (most are recorded separately as Special Transactions-Non-trade in Table 4) gold and gold products where the value of the gold content is 80 per cent or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadians returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Imports are credited to the country from which goods are consigned to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I (SC Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are blank.

Units of weight or volume are measured net of the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Numbers refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit cannot be calculated). All units of quantity used in this report are defined on page 9.

1. **Source des données:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes, sauf dans le cas des importations de l'électricité, qui sont déclarées directement par les compagnies importatrices Statistique Canada.
2. **Périodes de temps:** La statistique des importations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'importation parvenus à SC durant le mois civil. Il y a un décalage d'une semaine entre le dédouanement effectif des importations et l'arrivée des documents qui s'y rapportent à SC. Les importations d'électricité sont ordinairement comprises dans la statistique du mois où elles ont effectivement eu lieu.
3. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Il peut y avoir, toutefois, une différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois.
  - a. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des importations (la majorité est classée séparément en Transactions spéciales-hors commerce au Tableau 4): l'or et les articles en or dont la valeur de la teneur en or représente 80 p 100 ou plus de la valeur totale sauf les alliages d'or dentaire (classe 882-99) et une petite quantité de déchets d'or sous forme de balayures de bijoutiers (classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada ou rapportées par les canadiens rentrant de leur service hors du Canada; les importations provisoires pour expositions et concours, les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement; les navires de construction et d'immatriculation britanniques importés pour usage au Canada et les navires achetés pour usage comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada; les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens; en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien.
4. **Pays de provenance:** Les importations sont créditées au pays de consignment vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.
5. **Quantités:** Les Tableaux 3 et 4 donnent les quantités suivant les unités déterminées pour chaque classe dans la "Classification des marchandises d'importation", vol. I (SC numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas mentionnée, les colonnes de quantité demeurent en blanc.

Les unités de poids ou de volume sont mesurées nettes de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le tarif douanier. Le nombre vise les articles complets (ou suffisamment complets) importés, sauf les pièces de rechange. Les nombres représentent des unités complètes (ou assez complètes) exportées, sans les parties (pour les catégories où la valeur indiquée comprend à la fois des unités et des parties d'unités, il est impossible de calculer la valeur moyenne par unité complète). Toutes les unités de quantité employées dans le présent rapport sont expliquées à la page 9.

**Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of imports from a particular country in any commodity class is less than \$500, a line for that country is printed if a quantity is available and only the quantity is shown. Where the cumulative value is \$500 or more but the value for the current month is less than \$500 a quantity (if applicable) but no value appears in the current month column. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

**Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears on page 10, and full descriptions of all commodities appear in the Import Commodity Classification, Vol.I. The letters "n.e.s." mean "not elsewhere specified".

**Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

**Treatment of Confidential Information:** It is occasionally necessary when producing current statistics to withhold publication of details of imports where commodity or country information is known to involve disclosure. The suppression of country detail, however, does not affect class totals, which include all transactions which have been reported to SC during the calendar month.

**Valeurs:** Ordinairement, la valeur des marchandises importées est la valeur déterminée pour fins de droits de douane. La loi canadienne sur les douanes exige généralement l'évaluation des marchandises f. à b. au point d'expédition dans le pays exportateur mais, les importateurs déclarent souvent la valeur c.a.f. pour les marchandises en franchise ou les marchandises sujettes à un tarif déterminé. On s'efforce d'assurer que la valeur f. à b. soit régulièrement employée dans la statistique des importations.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des importations en provenance d'un pays en particulier dans une catégorie de marchandises est inférieure à \$500, une ligne apparaît dans le rapport si une quantité est disponible et la quantité seulement est indiquée. Lorsque la valeur cumulative est de \$500 ou supérieure mais, pour le mois en cours, inférieure à \$500, une quantité (si disponible), paraît mais par contre aucune valeur ne paraît dans la colonne du mois en cours. Tous les totaux et toutes les valeurs cumulatives sont calculés à partir de chiffres non arrondis et sont arrondis indépendamment en milliers de dollars; ils différeront donc souvent de la somme des chiffres arrondis du rapport.

**Abréviations:** Plusieurs descriptions de pays et de marchandises employées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations des pays paraît à la page 11 et des descriptions complètes de toutes les marchandises paraissent dans la "Classification des marchandises d'importation", Vol.I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

**Classification des pays:** Quoique les statistiques soient ventilées géographiquement les désignations des états et des territoires ne comportent nullement une signification politique, territoriale ou constitutionnelle.

**Renseignements confidentiels:** Dans la production des statistiques courantes, il est parfois nécessaire de supprimer les détails des importations de certains produits pour protéger le caractère confidentiel de données individuelles, qui pourrait être compromis par la publication de chiffres pour certains produits ou certains pays. La suppression des détails pour les pays ne modifie toutefois pas les totaux de classe, qui comprennent toutes les opérations dont il a été fait rapport à SC au cours du mois civil.

Commencing January 1, 1969, documents of imports from the United States valued at less than \$1,500 each have been subject to a 10 per cent systematic sample to provide estimates for low-value imports from that country. Import documents from the U.S. exceeding \$1,500 and all import documents from other countries, regardless of value, continue to be processed and compiled by complete count.

All documents are sorted into homogeneous commodity groupings according to tariff item information on the document. The low-value documents covering imports from the U.S. are selected from each commodity grouping and are subject to a systematic sample with a random start.

Once the document is selected through the sample procedure, the value, quantity and customs duty of each sample line are mechanically inflated by dividing by the sampling ratio. For example, if the sampling ratio were 1/10, all lines shown on the sampled documents would be multiplied by 10, and the estimates thus derived are included with the complete count statistics.

It should be noted that the aggregate value of low-value documents of U.S. imports accounts for 6 per cent to 7 per cent of the import total, (8 per cent to 10 per cent for imports from the U.S.) but accounts for some 60 per cent of all documents (some 70 per cent of documents for imports from the U.S.).

The estimated \$80 million a month of low-value U.S. imports is subject to a sampling variability of 1 per cent to 2 per cent. This means that there is a 2 in 3 chance of the estimated value differing from the "true" value by not more than 1 per cent to 2 per cent.

Estimates for individual commodity classes are of course subject to varying degrees of sampling variability. The closeness of individual estimation to "true" values also varies with the universe of documents selected for the particular class in any particular sample. While it is difficult to represent this in tabular form, readers should be aware that the odds against a particular estimate being close to the true value by a specified percentage increase quite rapidly as the universe of documents upon which the estimate is based decreases.

Depuis le 1er janvier 1969, on établit à partir d'un échantillon systématique de 10 p. 100 des documents concernant les importations d'une valeur inférieure à \$1,500 des estimations sur les marchandises de faible valeur importées des Etats-Unis. Les données sur les marchandises valant plus de \$1,500 importées des Etats-Unis et toutes les marchandises importées des autres pays, quelle qu'en soit la valeur, continueront d'être dépouillées et compilées exhaustivement.

Tous les documents sont répartis en groupes homogènes de marchandises, suivant les groupes du tarif douanier. Sur chaque groupe, on prélève les documents sur les marchandises de faible valeur importées des Etats-Unis et on procède à un sondage systématique dont le premier élément est choisi au hasard.

Pour chaque document sélectionné par sondage, on procède automatiquement la valeur, la quantité et les droits de douane sur chaque ligne, en les divisant par le taux d'échantillonnage. Par exemple, si le taux d'échantillonnage est de 1/10, les données sur chaque ligne des documents sélectionnés sont multipliées par 10 et les estimations ainsi calculées sont incorporées aux résultats de la compilation exhaustive.

Il convient de noter que les documents sur les importations de faible valeur en provenance des Etats-Unis représentent de 6 p. 100 de la valeur globale des importations (de 8 p. 100 à 10 p. 100 des marchandises importées des Etats-Unis), mais quelque 60 p. 100 de l'ensemble des documents (environ 70 p. 100 des documents sur les importations des Etats-Unis).

Vu qu'elle résulte d'un sondage, la valeur estimative des marchandises de faible valeur importées chaque mois des Etats-Unis (en millions de dollars) peut varier de 1 à 2 p. 100 par rapport à la valeur "réelle". Cela veut dire que, dans 2 cas sur 3, la valeur estimative ne diffère pas de la valeur réelle de plus de 1 ou 2 p. 100.

La variabilité de sondage des estimations peut varier d'une catégorie de marchandises à une autre. L'écart entre chaque estimation et la valeur "réelle" varie également, dans tout sondage, en fonction de l'univers de documents sélectionné pour chaque catégorie. Il est difficile de représenter ceci sous forme de tableau, mais le lecteur ne doit pas oublier que le nombre de chances d'obtenir une estimation ne différant pas de la valeur réelle de plus de tel pourcentage diminue rapidement si l'univers de documents qui sert de base à l'estimation se restreint.

EL .....	Volume in barrels.
GRAT .....	Weight in carats.
CRD .....	Volume in cords.
C/T .....	Weight in units of 100 lb.
C/T N .....	Weight of contents in units of 100 lb. (containers excluded).
DZ .....	Number of dozens.
D PR .....	Number of pairs in dozens.
F .....	Length in linear feet.
GL .....	Volume in Canadian gallons.
GSS .....	Number of gross.
K .....	Weight in kilograms.
LE .....	Weight in pounds.
LEN .....	Weight of contents in pounds (containers excluded).
M .....	Number in thousands.

M B F .....	Volume in thousand board feet.
M C F .....	Volume in thousand cubic feet.
M KWH .....	Thousand kilowatt hours.
NO .....	Number.
OZ .....	Weight in ounces.
PACK .....	Number of packs.
PAIR .....	Number of pairs.
P GAL .....	Volume of alcoholic content in Canadian Gallons of the strength of proof.
PKG .....	Number of packages.
SF 3/8 .....	Volume in square feet of 3/8 inch in thickness.
SQ FT .....	Area in square feet.
SQ YD .....	Area in square yards.
TON .....	Weight in short tons of 2,000 lb.
TR OZ .....	Weight in troy ounces.

UNITES DE QUANTITE

BR .....	Volume en barils.
CAAT .....	Poids en carats.
CODE .....	Volume en cordes.
DOZ .....	Nombre de douzaines.
D RE .....	Nombre de douzaines de paires.
GAL .....	Volume en gallons canadiens.
GAL P .....	Volume du contenu alcoolisé en gallons canadiens de preuve.
GR .....	Nombre en grosses.
KIL .....	Poids en kilogrammes.
IV .....	Poids en livres.
IVS .....	Poids du contenu en livres (récipients exclus).
M .....	Nombre en milliers.
M KWH .....	Milliers de kilowatts-heure.

M PCU .....	Volume en milliers de pieds cubes.
M P P .....	Volume en milliers de pieds planche.
NOMB .....	Nombre.
ONCE .....	Poids en onces.
ON TR .....	Poids en onces troy.
PAIRE .....	Nombre de paires.
PAQ .....	Nombre de paquets.
PC 3/8 .....	Volume en pieds carrés de 3/8 de pouce d'épaisseur.
PI .....	Longueur en pieds linéaires.
PI CA .....	Superficie en pieds carrés.
QTL .....	Nombre en quintal en poids de 100 livres.
QTL N .....	Poids du contenu en quintal de 100 livres (récipients exclus).
TONNE .....	Poids en tonnes courtes de 2,000 livres.
VG CA .....	Superficie en verges carrées.

**Note:** The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the annual Vol III, Imports 1966-1968, Catalogue No. 65-203. Amendments effective in any year are listed in the January report for that year. The use of territorial titles carries no political, territorial or constitutional implications.

\* Imports of electricity were normally included in statistics for the month in which they actually occurred. As of June 1971, however, such imports are reported with statistics for the following month.

Les importations d'électricité étaient ordinairement comprises dans la statistique du mois pendant lequel elles avaient effectivement eu lieu. Cependant, depuis la statistique de juin 1971, ces importations sont comprises avec les statistiques du mois suivant.
